

Spray Adhesive

1/1

Aerosol -

Spray Adhesive is a modern, sprayable contact glue, for the fast and efficient gluing of plastic coverings, leather, rubber, foam, felt and films to each other and to wood or metal, for example.

Spray Adhesive is very homogenous, as a result of which it can be sprayed very evenly, without blocking the nozzle. A good bond can be achieved using only a small quantity of product. After applying the glue the parts can still be repositioned for 5 minutes, after which an extremely high adhesive power is obtained.

Thanks to its aerosol packaging Spray Adhesive is extremely user friendly and easy to apply. Due to the unique adjustable nozzle the product can be sprayed from a cone to flat fan pattern, making it perfectly suited to both small and very large surface areas.

Properties:

- Adjustable nozzle, adjustable quantity.
- Adjustable insert, adjustable spray pattern.
- Simple and clean to work with.
- Transparent layer of glue.
- No clots or blockages.
- Fast effective bond.
- Can be corrected within a short time (\pm 5 minutes).
- High adhesive strength, economic use of materials.
