

■ Spotprimer

1/1

Aerosol - 500ml

Spotprimer is a high-quality, fast-drying, single component insulation primer, specially developed to treat the last remaining sanded areas before spraying the finishing layer. Spotprimer adheres perfectly to just about any treated or untreated surface such as steel, galvanised steel, aluminium, stainless steel, wood, plaster and most types of plastic. Due to its unique composition Spotprimer is suitable as a base layer for just about every type of modern paint system.

Due to its extremely fast drying, Spotprimer is dust dry after 5 minutes and can be painted over after 15 minutes. The excellent fluidity created by its unique composition of resins and solvents means that Spotprimer produces an ultra smooth surface that requires little or no sanding. And this unique composition makes Spotprimer resistant to just about every kind of modern degreaser.

Spotprimer is light grey in colour giving excellent cover for just about any colour painted over it.

Thanks to its aerosol packaging Spotprimer is extremely user friendly and easy to apply. The product comes with a special nozzle, which creates a professional spray pattern with no over-spray, exactly like the cone of a spray gun. The nozzle is adjustable, so that the product can be sprayed horizontally and vertically.

Properties:

- Perfectly suited to sanded edges.
- Excellent adhesion to the most common surfaces.
- Very fast drying and hardening.
- Excellent fluidity.
- Good resistance to most degreasers.
- Can be sprayed over using just about any modern paint system.
- Professional spray pattern.
