

■ Airco Clean Control

## Aerosol - 250ml

Airco Clean Control is a unique professional cleaner for air conditioning systems. Airco Clean Control removes dirt at the source; the evaporator. In addition to cleaning the system perfectly the product ensures that new dirt finds it much more difficult to adhere to the surface.

Airco Clean Control offers a very simple yet perfect solution for cleaning A/C systems. When the A/C system gets dirty this reduces hygiene, which can cause irritation to the bronchial passages and eyes. Airco Clean Control also prevents the dirt in the system from developing an unpleasant odour at a later stage.

Airco Clean Control is the ideal solution for a perfect cleansing of the A/C system. This product is extremely easy to use - it applies a dense foam to the evaporator coil in the A/C system. Airco Clean Control completely dissolves all deposits of dirt, leaving a fresh odour behind. The liquid residue leaves the system via the condensate drain.

Airco Clean Control is extremely user friendly. The product is supplied in an aerosol, which comes with a special long hose and nozzle. The hose is used to apply the product to the evaporator coil. The 250 ml content is sufficient to clean the A/C system completely.

Properties:

- Cleans dirt at the source; the evaporator.
- A highly active and substantial foam whose constituents are effective for a long period of time.
- Has a pleasant odour.
- Optimal cleaning ensures that new dirt will find it more difficult to gain a hold.
