1l ... Art. nr 04.0300
 5l ... Art. nr 04.0301
 10l ... Art. nr 04.0302

Bottle - 1000ml

Calcium Clean is a unique and very powerful cleaner that removes calcium and rust in a very effective manner. Due to its unique composition, the product is extremely well suited to the cleaning of sanitation areas such as bath and shower cubicles, toilettes and swimming baths.

Calcium Clean is also safe for kitchens, kitchen working tops and tiling. Due to its composition, Calcium Clean will not affect the most common metal surfaces. This property means that it can be used without problem on these frequently vulnerable materials. Calcium Clean can be used in the food industry, if applied according to the HACCP-norms in force.

Calcium Clean forms a foam when applied, the advantage being that this gives it an optimum effect on vertical parts so that the product is ideal for decalcifying chromed or stainless steel taps, washbasins, stainless steel equipment and tools. The products leaves a pleasant odour behind after use.

Calcium Clean is ready to use and does not require further dilution. Due to its specially developed foam trigger, it creates a stable foam, as a result of which it has a long period of action on rust and calcium deposits. Also available in an economical 5 l and 10 l can.

Properties:

- Removes calcium deposits in an extremely simple and effective manner
- Does not affect metals
- Pleasant odour
- After application the product forms a foam, thereby ensuring optimal working, even on vertical parts
