

## ■ Carb Clean

1/1

### Aerosol - 500ml

Carb Clean is an extremely effective cleaner for the carburettor. The product cleans the whole of the inside and all carburettor components, without having to take it apart. It can be sprayed directly into the float chamber.

Carb Clean removes oxidation, gum formation of the petrol and grease and possible carbon deposits. These impurities affect the good mechanical functioning of the carburettor. After cleaning the engine runs better, more smoothly, and more economically, and the exhaust emissions are better.

The product is perfectly suitable for all common carburettor types on vehicles and machinery. It is also suitable for cleaning the outside of the carburettor and air valve, and the injectors in injection systems.

Despite its good cleansing effect Carb Clean does not have an exaggeratedly penetrating odour.

Thanks to its aerosol packaging Carb Clean is extremely user friendly and easy to apply. Due to the unbreakable nozzle and narrow tube the product is easy to inject and can reach all of the difficult-to-access parts of the carburettor. The nozzle also allows use of the spray can in all positions.

#### Properties:

- Simple to use, without much need to disassemble.
- Versatile in use; also suitable for injection systems.
- Suitable for vehicles with catalytic converters.
- High cleaning power.
- Removes resin and oil deposits quickly.
- Leaves no residues.
