Reference: Innotec Products.

Dear Melanie,

I thought after 4 years of using your products, I should write to tell you just how good they are.

I know that they are predominantly designed for the automotive industry and I work in construction. But, as you are aware, I have used them for a varying range of jobs throughout my working week.

Your Flagship product 'Adheseal' is quite simply brilliant. I have tried other products that can allegedly work under water, these shall remain nameless, [they know who they are!]. But after Jim, so ably demonstrated that, 'Adheseal' actually does work!! Gone are the days when I have to assess a leaking gutter for example, only to return at a later date to complete a repair. This can now be done at the time of my inspection, rain or shine.

'Sprayseal' also, in my opinion, is a market leader. I describe it as 'Adheseal's' little brother, as although it is thinner, it is of a similar if not the same compound, thus making it able to be sprayed, meaning awkward situations that are unable to be attended to without 'major surgery' can be dealt with, with a minimum of fuss.

As you know we also install a large amount of plastic fascias and soffits, 'Easy Clean' is simply the best cleaner we have come across. We have a spray bottle in both of our vehicles at all times and I have been pressurised into leaving a few bottles at clients' houses because they are so impressed at the state that we have left their other plastics in, and they wish to maintain it.

The list of Innotec products that we have used goes on and on, and every one of them is superb and leaves their competitors in the shade.

I will continue to use Innotec products for the foreseeable future, as I firmly believe that they cannot be bettered, unless the boys in white coats manage to improve upon perfection!! Thank you so much for introducing them to me, I think Innotec should use the slogan,

"Innotec, we make the difficult jobs easy" because you do.

Yours truly

  
Bill Wyatt.
